

## **ACSA Webinar presenter Jennie Vine**

### **BIOGRAPHY**

Having over 25 years teaching experience in both primary and secondary settings I have researched deeply on how to improve student engagement, outcomes, well-being, deep learning capacity and entrepreneurship. Working in a contemporary setting I have been able to develop and test my ideas, sharing my breakthroughs with Primary and Secondary School educators, in both government and private sectors, Australia wide and internationally. My work connected to passion based learning, long term research projects and learning symposiums has been recognised by Michael Fullan, Yong Zhao and Edutopia 'The George Lucas Foundation' in America.
